

Final-year B.Tech CS&E student (8.80 CGPA) with backend, platform, and production deployment experience on a live cybersecurity GRC product, plus defence and research-lab internships. Proficient in Java, Python, Go and PostgreSQL. Skilled in reliability engineering (Prometheus, structured logging, distributed tracing, alerting), secure development, and networking fundamentals.

SKILLS

Languages	: Java (Proficient), Python (Intermediate), Go (Familiar), Rust (Intermediate)
Databases	: PostgreSQL(Intermediate), Supabase, SQLite, Relational Schema Design
Software & Web	: React, Node.js, Next.js, Express, Socket.IO, REST APIs, FastAPI, Git/GitHub, CI/CD
Platform & Reliability	: Prometheus, Pino, Tracing, Alerting, WebSockets, Docker, Kubernetes, AWS
Security & Compliance	: JWT/JWKS auth, AES-256-GCM, Cryptography, Audit logging, Rate limiting
Soft Skills	: Secure SDLC, Agile delivery, End-to-end Ownership, Cross-team Collaboration, Communication

WORK EXPERIENCE

Software Development Intern / Cyberpal.ai <i>Technology Crest Corporation</i>	02 2026 — Present <i>Fair Oaks, California</i>
---	--

- Built a server-management and observability console from scratch (Node.js, Express, Socket.IO) that supervises backend and frontend services, streaming live stdout/stderr to a web UI over WebSockets with cross-platform process-tree termination and graceful shutdown.
- Instrumented the platform with Prometheus metrics and Pino structured logging, monitoring HTTP throughput, error rate and P99 latency on a custom dashboard; added edge-triggered alerts on heap usage, event-loop lag, error rate and latency plus health checks, replacing manual incident discovery with automated detection and faster recovery.
- Implemented distributed tracing with correlation IDs, automatic secret redaction in logs, and a real-time pipeline that normalises and audits access/error logs and resolves user identity, supporting the product's GRC controls.

Research & Development Intern / DRAD-MS & BLADE <i>DRDO - PXE : Defense Research & Development Organization - Proof and Experimental Establishment</i>	05 2025 — 06 2025 <i>Chandipur, Odisha</i>
--	--

- Designed, built and deployed two internal applications (DRAD-MS and the BLADEngine) for mission data management and trajectory analysis, inside a secure, access-controlled environment with strict handling and compliance requirements.
- Automated manual infrastructure provisioning and deployment steps; diagnosed and eliminated recurring systemic errors in the trajectory-tracking pipeline, improving reliability of downstream analysis.

Project Assistant / DST - SERB CRG Reasearch Project <i>Vellore Institute of Technology</i>	05 2024 — 06 2024 <i>Bhopal, Madhya Pradesh</i>
---	---

- Built a Python molecular-visualisation tool (PyMOL/OpenGL) interoperating with quantum chemistry packages (Gaussian, GAMESS, NW Chem, MOPAC); profiled and optimised the rendering path for large structures.

PROJECTS

ANX - Compiled Programming Language & Compiler / ARX Studios <i>Rust, LLVM JIT (ExecutionEngine), LLVM TargetMachine, Clang, Cargo, clap/anyhow, assert_cmd</i>	03 2025 – Present
---	--------------------------

- Built a statically-typed, compiled language in Rust — lexer, recursive-descent/Pratt parser, type checker, tree-walking interpreter, and an LLVM 21 native backend linked against a custom C runtime; shipped a check/run/build CLI with interpreter/compiler parity, verified by a 20-problem benchmark suite and 150+ tests.

ChronoVault / chronovault-psi.vercel.app <i>React, Go, Python FastAPI, Siamese Neural Network, Solidity (Ethereum), Pinata IPFS, Supabase</i>	08 2025 – 02 2026
---	--------------------------

- Built a secure file storage platform (Go, React, Solidity) featuring AES-256-GCM encryption, Merkle-tree integrity verification, IPFS sharding, Ethereum-based proof-of-integrity, and biometric (Siamese network) authentication.

PersonaFi / Google Agentic AI Day Finalist - Top 10 <i>Go (MCP server via mark3labs/mcp-go), Google ADK, Vertex AI Agent Engine, Flask, Firebase (Auth + Hosting)</i>	06 2025 – 08 2025
---	--------------------------

- Built an AI financial advisory platform with a Go-based MCP server and a Python multi-agent system (Google ADK + Gemini) that analyzes users' net worth, credit, and investments via 6+ sub-agents — with a dashboard, real-time chat, and Firebase Auth.

EDUCATION

Vellore Institute of Technology B.Tech, Computer Science and Engineering 8.80 CGPA	2023 – 2027 (Expected)
Indian Institute of Technology BS, Data Science and Applications Online Degree	2024 – 2028 (Expected)
BJEM School - II Class X : AISSE 90.8 Percent 2021	ODM Public School Class XII : AISSCE 77.6 Percent 2023

CERTIFICATIONS & ACTIVITIES

Founder ARX Studios, Registered MSME		
Founder Agentic Intelligence Club, VIT Bhopal		
Stanford Algorithms Specialization	Cisco Networking CCNA 200-301	Google AI Professional Certificate
AWS Certified Cloud Practitioner	AWS Certified Solutions Architect - Associate	AWS Certified Developer - Associate
